EDUCATION

Universitas Indonesia Jakarta
Bachelor of Computer Science (S.Kom) · GPA: 3.56/4.00 Aug 2023 – Present
Relevant coursework: Machine Learning, Spoken Language Processing, Cloud Computing, Software Engineering, Computer Networks, Cryptography, Quantum Computing

SMANU MH Thamrin Jakarta
Natural Sciences Track (IPA) Jul 2020 – Jul 2023

WORK EXPERIENCE

Faculty of Computer Science, Universitas Indonesia Jakarta
Teaching Assistant – Introduction to Computer Organization Aug 2024 – Jun 2025

- Created study materials covering course theory to support students' learning and exam preparation
- Delivered tutoring sessions and extra guidance to help students master computer organization concepts
- Supervised laboratory sessions, guiding students through the hands-on, practical side of the course
- Assisted lecturers in grading assignments and managing student grades

PROJECTS

Speech Recognition for Stuttered Speech | *Python, OpenAI Whisper*

- Building a speech-to-text system that better understands people who stutter, using OpenAI's Whisper model
- Reproduced an existing research project and adapted its approach to fit this goal

Smart Invoice Reminder AI (SIRA) | *Python, FastAPI, React*

- Developer and Scrum Master for a platform that helps businesses automatically remind customers to pay their invoices; led sprint planning and kept a 9-person team's work on schedule
- Built a feature that rates each customer's payment risk as low, medium, or high, so businesses know who to follow up with first
- Made a slow background process about 97% faster (from 121 ms to 4 ms) by fixing how it loaded data, and wrote about this and other lessons from the project on my technical blog

SubmiD | *TypeScript, React*

- Blockchain-based platform for creating forms and collecting responses, built by a 4-person team in about two weeks; won 1st place at CodeFest ICP Hackathon 3.0
- Responsible for testing and deploying the platform

SKILLS

Languages: Python, Java, JavaScript, Rust, C++, SQL
Frameworks: FastAPI, Django, Spring Boot, React
Machine Learning: Speech recognition (Whisper), classification, clustering, Random Forest
Tools & Cloud: Git, Docker, AWS EC2, Linux, Scrum
Spoken Languages: English, Bahasa Indonesia

AWARDS

Champion – CodeFest ICP Hackathon 3.0 May 2024
Won 1st place with SubmiD, a blockchain-based form platform my 4-person team built in about two weeks alongside full-time coursework.
